Summary

Product Designer with over seven years' experience across enterprise, agency and startups, using research to guide design decisions and AI workflows. At Perforce, I built custom Claude workflows for UI generation and design specifications that won "Best Designed" at the 2026 company hackathon and reached 5+ design teams across the company. I refine AI-generated interactions against user needs and the product's design system, then work with developers and QA through implementation. My work includes AI agent UX, client projects and launching SportsWork. I'm interested in gamification and applying this experience to betting and casino products.

Experience

Product Designer at Perforce

September 2025 to present

P4 DAM, P4 Plan, P4 Cloud and more.

- **AI Workflows & Leadership:** Built custom Claude workflows for UI generation and design specifications. Won "Best Designed" at the 2026 company hackathon, scaled adoption across 5+ design groups, and joined the company's high-level AI task group to shape workflows for a 20-person design organisation.
- **Design to Production:** Used Claude Code to build production UI, helping the team ship around 25% more features in Q3 2026 than Q2. Planning fell from about an hour to 30 minutes per feature, by my estimate. I work directly with QA to check implementation against designs and correct UI discrepancies in front-end code.
- **Product Direction:** Directed end-to-end design across software version control, digital asset management and creative project planning, partnering with executive leadership on customer acquisition and retention.
- **Information Architecture:** Redesigned information architecture and in-product navigation to remove user workarounds and improve user satisfaction.
- **Trial Onboarding:** Rebuilt trial onboarding to remove setup friction so prospects could evaluate the product themselves, streamlining the sales process and generating more pipeline opportunities.

Product Designer at Budibase

July 2024 to July 2025

Low-code platform for internal apps, automations and AI agents.

- **Workflow UX:** Worked with the Head of Product and developers to redesign workflow debugging, bringing step inputs, outputs and errors into a sidebar. Negative Discord feedback reports fell from 8–10 per month to zero during post-launch monitoring; the reusable step structure supported Budibase's later move into AI agents.
- **Research & Prioritisation:** Led a paid Maze study with 25 users and presented findings to the CEO, CMO and Head of Engineering. With 68% naming debugging among their biggest frustrations, I made the case to prioritise it over other requests, informing my design of data-heavy workflow interfaces.
- **Product Ownership:** Led product direction and design for core features, helping Budibase advance towards profitability as an independent AI startup. Delivered with remote teams at Budibase and Perforce through regular calls and ongoing communication.
- **Onboarding & Conversion:** Reduced onboarding from 20 steps to 3, accelerating time-to-value, boosting trial conversions and driving purchases of additional products and professional licences.

UX Designer at DawsonAndrews

June 2021 to July 2024

Digital product design agency.

- **SportsWork Launch:** Partnered with former rugby international David Humphreys to design, brand and launch SportsWork, a sporting jobs platform, from scratch, successfully scaling it into an independent, profitable business.
- **Design Systems & Delivery:** Built Figma systems, tokens and component libraries for CityFibre and GSMA, using auto layout, variables and reusable components for CityFibre's marketing website. A Tailwind-aligned system and clearer implementation guidance supported CityFibre's six-week website rebrand. Handovers reduced developer questions and design tickets returned from 15% to 5%, with the team a top performer across 10 service partners.
- **Accessible Design:** Adapted CityFibre's vivid brand colours to meet AA contrast requirements and adjusted typography for readability across the website and portal.
- **User Workshops:** Ran a post-launch workshop with 40 B2B portal users, turning feedback on dashboards, incidents, filtering and search into a Figma report for leadership. Checked AI-assisted analysis against the original responses.
- **CityFibre Website & Portal:** Led responsive redesigns of CityFibre's homepage and B2B portal, doubling user satisfaction and increasing completed availability checks by 90% against the month before launch. The work generated tens of thousands of pounds in additional revenue and helped win Hyperoptic as a client; that account supported nine hires, including two designers.
- **Mentoring:** Mentored junior and mid-level designers while scaling the team from two to six. I'm super proud to have supported designers who have since built thriving careers in the Belfast tech scene.
- **Design Range:** Delivered design across startups, marketing platforms, e-commerce, news outlets, public sector services, enterprise software, public infrastructure and sports.

Contract Product Designer

August 2020 to May 2021

Contract design for startups, law firms and local businesses.

- Partnered with local companies, including LoyalBe, alongside an Australian law firm and independent projects to broaden UX design expertise between full-time roles.

Service Designer at the Northern Ireland Civil Service

August 2019 to July 2020

Public sector digital services.

- **Secure Environments:** Served as lead designer on confidential digital products utilised by the Police Service, the Department of Justice, and other public sector agencies.
- **Public-Facing Platforms:** Designed digital recruitment and employment experiences deployed across towns and cities throughout Northern Ireland, positively impacting hundreds of recruiters across targeted services.
- **Recognition:** Received a Departmental Head Award for outstanding work in digital service design.

Further experience and full career history are available on LinkedIn.

Skills

AI & Workflows: Claude Code, Claude skills, MCP servers, Encoding design systems for AI, Human-in-the-loop UI, AI-assisted prototyping, Cursor, Figma Make, Agentic workflows.

Product & UX Design: Usability testing, Data-driven UX, Systems thinking, Product ownership, User experience (UX), User interface (UI) design, User research, Interaction design, Information architecture, Design systems, Tokens, Typography, Visual hierarchy, Accessibility (WCAG AA), Keyboard navigation, Focus states, Screen reader checks.

Front-end & Prototyping: Production code, Near-production prototypes, HTML, CSS, Tailwind CSS, Git, Component-driven development.

Tools: Figma, Interactive prototypes, Responsive design, Maze, Mouseflow, Google Analytics, Jira, Local development environments.

Education

BDes (Hons) Interaction Design (First Class)
Ulster University · 2017 to 2021
