Ben Turner

Product Designer

Belfast, UK · Remote / hybrid · benturner.work
+44 7546 182198 · Benjamin.turner.design@gmail.com · linkedin.com/in/benturnerwork

Summary

Product Designer with over seven years' experience across agency, enterprise and startups. I led research-driven redesigns of CityFibre's homepage and B2B portal, increasing completed availability checks by 90% and doubling user satisfaction. My work spans responsive websites, accessible brand implementation, design systems and developer handover. I use face-to-face research and qualitative studies to guide decisions, and bring hands-on Claude Code and production UI experience alongside my design practice.

Experience

Product Designer at Perforce

September 2025 to present

P4 DAM, P4 Plan, P4 Cloud and more.

- **Trial Onboarding:** Rebuilt trial onboarding to remove setup friction so prospects could evaluate the product themselves, streamlining the sales process and generating more pipeline opportunities.
- **Information Architecture:** Redesigned information architecture and in-product navigation to remove user workarounds and improve user satisfaction.
- **End-to-End Delivery:** Directed product design across software version control, digital asset management and creative project planning, partnering with executive leadership on customer acquisition and retention.
- **Design to Production:** Used Claude Code to build production UI, helping the team ship around 25% more features in Q3 2026 than Q2. Planning fell from about an hour to 30 minutes per feature, by my estimate. I work directly with QA to check implementation against designs and correct UI discrepancies in front-end code.
- **AI Workflows & Leadership:** Built custom Claude workflows for UI generation and design specifications. Won "Best Designed" at the 2026 company hackathon, scaled adoption across 5+ design groups, and joined the company's high-level AI task group to shape workflows for a 20-person design organisation.

Product Designer at Budibase

July 2024 to July 2025

Low-code platform for internal apps, automations and AI agents.

- **Onboarding & Conversion:** Reduced onboarding from 20 steps to 3, accelerating time-to-value, boosting trial conversions and driving purchases of additional products and professional licences.
- **Workflow UX:** Worked with the Head of Product and developers to redesign workflow debugging, bringing step inputs, outputs and errors into a sidebar. Negative Discord feedback reports fell from 8–10 per month to zero during post-launch monitoring; the reusable step structure supported Budibase’s later move into AI agents.
- **Research & Prioritisation:** Led a paid Maze study with 25 users and presented findings to the CEO, CMO and Head of Engineering. With 68% naming debugging among their biggest frustrations, I made the case to prioritise it over other requests, informing my design of data-heavy workflow interfaces.
- **Product Ownership:** Led product direction and design for core features, helping Budibase advance towards profitability as an independent AI startup.

UX Designer at DawsonAndrews

June 2021 to July 2024

Digital product design agency.

- **CityFibre Website & Portal:** Led responsive redesigns of CityFibre's homepage and B2B portal, doubling user satisfaction and increasing completed availability checks by 90% against the month before launch. The work generated tens of thousands of pounds in additional revenue and helped win Hyperoptic as a client; that account supported nine hires, including two designers.
- **Design Systems & Delivery:** Built Figma systems, tokens and component libraries for CityFibre and GSMA, using auto layout, variables and reusable components for CityFibre's marketing website. A Tailwind-aligned system and clearer implementation guidance supported CityFibre's six-week website rebrand. Handovers reduced developer questions and design tickets returned from 15% to 5%, with the team a top performer across 10 service partners.
- **Accessible Design:** Adapted CityFibre's vivid brand colours to meet AA contrast requirements and adjusted typography for readability across the website and portal.
- **User Workshops:** Ran a post-launch workshop with 40 B2B portal users, turning feedback on dashboards, incidents, filtering and search into a Figma report for leadership. Checked AI-assisted analysis against the original responses.
- **SportsWork Launch:** Partnered with former rugby international David Humphreys to design, brand and launch SportsWork, a sporting jobs platform, from scratch, successfully scaling it into an independent, profitable business.
- **Mentoring:** Mentored junior and mid-level designers while scaling the team from two to six. I'm super proud to have supported designers who have since built thriving careers in the Belfast tech scene.
- **Design Range:** Delivered design across startups, marketing platforms, e-commerce, news outlets, public sector services, enterprise software, public infrastructure and sports.

Contract Product Designer

August 2020 to May 2021

Contract design for startups, law firms and local businesses.

- Partnered with local companies, including LoyalBe, alongside an Australian law firm and independent projects to broaden UX design expertise between full-time roles.

Service Designer at the Northern Ireland Civil Service

August 2019 to July 2020

Public sector digital services.

- **Secure Environments:** Served as lead designer on confidential digital products utilised by the Police Service, the Department of Justice, and other public sector agencies.
- **Public-Facing Platforms:** Designed digital recruitment and employment experiences deployed across towns and cities throughout Northern Ireland, positively impacting hundreds of recruiters across targeted services.
- **Recognition:** Received a Departmental Head Award for outstanding work in digital service design.

Further experience and full career history are available on LinkedIn.

Skills

Visual & UX Design: Typography, Visual hierarchy, User experience (UX), User interface (UI) design, User research, Interaction design, Information architecture, Usability testing, Accessibility (WCAG AA), Keyboard navigation, Focus states, Screen reader checks, Data-driven UX, Systems thinking, Product ownership.

Design Systems & Tools: Design systems, Tokens, Figma, Interactive prototypes, Responsive design, Maze, Mouseflow, Google Analytics, Jira, Local development environments.

Front-end & Implementation: HTML, CSS, Tailwind CSS, Component-driven development, Production code, Near-production prototypes, Git.

AI & Workflows: Claude Code, Figma Make, Cursor, AI-assisted prototyping, Claude skills, MCP servers, Encoding design systems for AI, Human-in-the-loop UI, Agentic workflows.

Education

BDes (Hons) Interaction Design (First Class)
Ulster University · 2017 to 2021
