Summary

Product Designer with over seven years' experience solving complex UX problems, supporting enterprise sales and improving business performance. I bridge design and engineering, using AI workflows and shipping production front-end code to speed up feature delivery. Enthusiastic, receptive to feedback and committed to helping teams do their best work.

Experience (7+ years)

Product Designer

Perforce · Enterprise software for version control, digital asset management and project planning.
September 2025 to present

Lead designer: Own product design and direction across P4 Cloud, P4 DAM and P4 Plan, covering cloud version control, digital asset management and project planning for game development. Work directly with executives and directors to improve the products and how they work together.

Shipping front-end code: Write and ship production UI using Claude Code, helping the team deliver 25% more features than the previous quarter. The workflows and systems I built also halved feature-planning time.

AI innovation: Built custom Claude skills and MCP servers to automate UI generation and design specifications. The system won Best Designed at the 2026 company hackathon and is used across at least five other design groups and product areas. Now part of the company's high-level AI task group, developing workflows and AI features for the design organisation.

Driven enterprise sales: Rebuilt trial onboarding so prospects could evaluate the software without complex setup. Sales representatives reported a much easier sales process and substantially more opportunities.

Removed user bottlenecks: Redesigned advanced filtering, tables and list views. Introduced clear information architecture and in-product navigation, replacing journeys that relied on the browser back button.

Shipped standout features: Designed Capacity Planning for P4 Plan, giving teams an at-a-glance view of capacity. The highly praised feature differentiated the product in a crowded market and attracted new customers.

Product Designer

Budibase · Low-code platform for internal apps, automations and AI agents.
July 2024 to July 2025

End-to-end ownership: Owned product direction and design, shaping core features that helped the startup approach profitability.

UX overhaul: Redesigned workflow debugging to show the data entering and leaving each step. Negative community feedback about this area fell to zero. The design supported Budibase's expansion into AI agents, a profitable and important product offering in 2026.

Enterprise features: Solved complex, data-heavy UX problems across conditional branching, role-based access control (RBAC) and spreadsheet-style formula calculations.

Streamlined onboarding: Reduced onboarding from 25 steps to three, helping more users access the product and experience its value sooner.

Product Designer
DawsonAndrews · Digital product design agency.
June 2021 to July 2024

Major client success: Led design for CityFibre, redesigning its B2B portal and homepage through user research. Doubled user satisfaction and increased completed availability checks by 90%. The success helped win a new agency account and fund nine additional hires, including two designers.

0-to-1 product launch: Designed and launched SportsWork with rugby player David Humphreys, spanning branding and product design. It became an independent, profitable business.

Design systems: Created enterprise design systems, tokens and component libraries for CityFibre and GSMA. Clearer handovers reduced developer questions, while tickets returned for design rework fell from 15% to 5%.

Team leadership: Mentored junior and mid-level designers as the team grew from two to six. Proud to have supported designers who have since built thriving careers.

Product Designer
Freelance
August 2020 to May 2021

Worked with small businesses including LoyalBe and an Australian law firm, alongside independent and hobby projects. These varied projects broadened my design experience between full-time roles.

UX / Interaction Designer
Northern Ireland Civil Service · Digital services.
August 2019 to July 2020

Secure environments: Served as a lead designer on confidential digital products utilised by the Police Service and the Department of Justice.

Public-facing platforms: Designed digital recruitment and employment experiences used across towns and cities in Northern Ireland.

Recognition: Received a departmental head award for outstanding work in digital service design.

Further experience and full career history are available on LinkedIn.

Skills

Product & UX Design: Product ownership, Interaction design, Design systems, Tokens, Typography, Visual hierarchy, Information architecture, Usability testing, Accessibility (WCAG AA), Systems thinking, Data-driven UX.

Front-end: Production code, Near-production prototypes, CSS, Tailwind CSS, HTML, Git, Component-driven development.

AI & Workflows: Cursor, Claude Code, Claude skills, MCP servers, Figma Make, Agentic workflows, Human-in-the-loop UI, Encoding design systems for AI, AI-assisted prototyping.

Tools: Figma, Maze, Jira, Local development environments.

Education

BDes (Hons) Interaction Design (First Class) - Ulster University (2017 to 2021)

Hobbies

Brazilian jiu-jitsu purple belt and **traditional jujitsu black belt**. I volunteer at my local parkrun and enjoy go-karting, aquariums, design events and organising company socials.
