

Summary

- **Product Designer:** Product and interaction design since 2015. I own the products I design at Perforce, Budibase and Dawson Andrews, and drive them as a hands-on IC.
- **Shipped output:** I design and ship in production front-end code. After a team cut from six to two, feature output was still 25% higher year on year. Homepage work that put 90% more people onto the buying journey.
- **Growth Mindset:** Highly coachable. Shaped by years of martial arts training and coaching.
- **Witty & Down-to-Earth:** Extraverted culture builder who organises team socials and likes talking to real people.

Experience

Product Designer September 2025 - today

Perforce · P4 Plan & P4 DAM. Enterprise software for games and media.

- I own product design for P4 DAM and P4 Plan and drive both products. Customers include Electronic Arts, Pinewood Studios, Xbox Game Studios and Meta. That work has directly helped sell multiple new customers onto Perforce systems.
- Front-end capacity was cut from six developers to two. The product still shipped 25% more features per quarter. Clarification questions dropped about 50%. Refinements went from about an hour to about 30 minutes, so roughly twice the features in the same time.
- I design and ship in production front-end code with Claude Code. Shipped multiple AI-enabled features, designed for how people and agents use the product. Built Claude skills other teams now use. Won Best Designed at the company AI hackathon in 2026.

 Shipping in production

 Owning P4 DAM

Product Designer July 2024 - July 2025

Budibase. Open-source low-code for internal apps and automations.

- I owned product design for Budibase as a whole, including how teams connect their own data, databases and APIs. Now also an agents and AI workflow toolkit.
- I rebuilt the automations builder, created new filter systems, and set up key workflows. I ran a paid study with 25 users, changed the design, and support complaints dropped from about ten at a time to none.
- That work became the foundation for Budibase’s AI product: agents and automations on a platform people already used.

 Automations overhaul

Product Designer June 2021 - July 2024

Dawson Andrews. Product design agency.

- Shipped work for GSMA, GAA, CityFibre, startups and public sector organisations.
- Lead product designer for CityFibre (about 2,000 people). Designed the B2B portal ISPs use to book engineers for home fibre surveys. Ran a workshop with 40+ people from Vodafone, TalkTalk and Zen, captured 1,400+ data points, and user satisfaction doubled after.
- Also designed the marketing website. 90% more people clicked through to the buying journey (Check availability) versus three months earlier. That product direction helped Dawson Andrews win Hyperoptic, hire five more people, and grow from a small startup agency into a medium-sized one.
