Summary

Product Designer with over seven years of experience driving business growth across enterprise, startup, and agency sectors. Known for bridging the gap between design and engineering, leveraging AI workflows and shipping production front-end code to accelerate feature delivery. Proven track record of delivering user-centred interfaces that resolve complex bottlenecks, scale operations, and directly boost enterprise sales.

Experience (7+ years)

Product Designer
September 2025 to present

Perforce Enterprise planning and digital asset management (DAM) software for games and media.

- **Lead designer** for planning and DAM tools used by major studios, including Electronic Arts, Xbox Game Studios, and Meta.
- **Bridged engineering gaps:** When front-end capacity dropped by 66%, I wrote and shipped production UI code using Claude Code. This maintained momentum, increased feature output by 25% compared with six months earlier, and halved planning meeting time per feature.
- **AI innovation:** Built custom Claude skills, MCP servers, and Figma plugins to automate UI generation and design specs. Won Best Designed at the 2026 company hackathon. As a result, I was invited into the company's high-level AI task group to develop new AI features for the design organisation.
- **Driven enterprise sales:** Rebuilt product trial onboarding, removing complex setups so prospects could easily evaluate the software. Sales representatives said it made their job easier and offered more sales opportunities.
- **Resolved user bottlenecks:** Redesigned search, navigation filters, and asset previews to fix severe friction points that previously forced users to rely on the browser back button.
- **Shipped standout features:** Designed Capacity Planning, a highly praised feature that differentiated the product in a crowded marketplace and drew in new customers.

Product Designer
July 2024 to July 2025

Budibase Open-source, low-code platform for internal apps, automations, and AI agents.

- **End-to-end ownership:** Owned product design for the platform, helping design the core features that transformed the startup into a near-profitable business.
- **UX overhaul:** Redesigned the automation builder after a 25-user research study. Visualised how data entered and exited each action, reducing community complaints to zero. This redesign became the foundation for Budibase's new AI agent product line.
- **Enterprise features:** Designed complex platform capabilities including conditional branching, role-based permissions, and spreadsheet-style formula calculations.
- **Streamlined onboarding:** Redesigned the licensing system to simplify onboarding across cloud, self-hosted, and air-gapped enterprise environments.

Product Designer
June 2021 to July 2024

DawsonAndrews Digital product design agency.

- **Major client success:** Led design for CityFibre (a major UK telecom). Redesigned their B2B portal and homepage based on extensive user research, doubling user satisfaction. This success helped win new accounts and funded 9 additional agency hires.
- **0-to-1 product launch:** Designed and launched a startup, SportsWork, from scratch across branding and product design. It successfully transitioned into an independent, profitable business.
- **Design systems:** Created and managed enterprise design systems, establishing token structures and component libraries for global clients like CityFibre and GSMA.
- **Team leadership:** Mentored junior and mid-level designers, helping scale the internal design team from 2 to 6 members.

Product Designer
August 2019 to July 2020

Northern Ireland Civil Service Public sector digital services.

- **Secure environments:** Served as a lead designer on confidential digital products utilised by the Police Service and the Department of Justice.
- **Public-facing platforms:** Designed digital recruitment and employment experiences used across towns and cities in Northern Ireland.
- **Recognition:** Received a departmental head award for outstanding work in digital service design.

Skills

Product & UX Design: Product ownership, Interaction design, Design systems, Tokens, Typography, Visual hierarchy, Information architecture, Usability testing, Accessibility (WCAG AA), Systems thinking, Data-driven UX.

Front-end: Production code, Near-production prototypes, CSS, Tailwind CSS, HTML, Git, Component-driven development.

AI & Workflows: Cursor, Claude Code, Claude skills, MCP servers, Figma Make, Agentic workflows, Human-in-the-loop UI, Encoding design systems for AI, AI-assisted prototyping.

Tools: Figma, Maze, Jira, Local development environments.

Education

BDes (Hons) Interaction Design (First Class) - Ulster University (2017 to 2021)

Hobbies

Martial arts since 2007 (BJJ purple belt, Japanese Jiu-Jitsu black belt, Judo green belt), Warhammer 30k, gym, fishkeeping, karting, travel, and dogs.
