

Summary

- **Product Designer:** Product and interaction design since 2015. Hands-on designer. I build design systems and ship the products they serve, at [Perforce](#), [Budibase](#) and [DawsonAndrews](#).
- **Shipped output:** I design and ship production front-end code. At [Perforce](#), feature output was still 25% higher after the front-end team was cut from six to two. At [CityFibre](#), homepage work put 90% more people onto the buying journey.
- **Growth Mindset:** Highly coachable. Shaped by years of martial arts training and coaching.

Experience

**Product Designer**September 2025 - today

[Perforce \(Puppet\)](#) P4 Plan and P4 DAM: secure planning and digital asset management software for games and media.

- I own product design for P4 DAM and P4 Plan, used by [Electronic Arts](#), [Pinewood Studios](#), [Xbox Game Studios](#) and [Meta](#). The interfaces hold secure enterprise data. That work has helped sell multiple new customers onto Perforce.
- I helped design and test a design system of written components, served through an MCP server so teams across Perforce can use it. Combined with a Claude plugin, it generates high-quality interfaces with AI. Claude systems I built won Best Designed at the company AI hackathon in 2026.
- I used that system to rebuild P4 DAM onboarding around the studio manager who buys it. Sales got a persona-driven trial, opportunities went up, and they said it made their job a lot easier.
- Front-end capacity was cut from six developers to two. The product still shipped 25% more features per quarter. I ship production front-end with Claude Code.

 Shipping production code

 Increasing sales opportunities

 Owning P4 DAM

**Product Designer**July 2024 - July 2025

[Budibase](#) Open-source low-code for internal apps, automations and AI agents.

- I owned product design for Budibase as a whole. Customers self-host, including in air-gapped and other secure environments, so their data stays on their own infrastructure.
- I rebuilt the automations builder, created new filter systems, and set up key workflows. I ran a paid study with 25 users, changed the design, and support complaints dropped from about ten at a time to none.
- That work became the foundation for Budibase’s later AI product: agents and automations on a platform people already used.

 Automations overhaul

**Product Designer**June 2021 - July 2024

[DawsonAndrews](#) Product design agency.

- I led and created design systems for [CityFibre](#), [GSMA](#), and SportsWork. For SportsWork I took a startup from zero to one: brand, product, and the live site. It is now an independent, profitable startup.
- Also worked with public sector, private, and corporate clients.
- Lead product designer for [CityFibre](#) (about 2,000 people). Designed the B2B portal and the marketing website. 90% more people clicked to check fibre availability, and portal satisfaction doubled after a 40-person ISP workshop.

Skills

Product & UX Design: Product ownership, Interaction design, Design systems, Tokens, Information architecture, Usability testing, Accessibility (WCAG / AA), Systems thinking, First principles, Product sense, High agency, Data-driven UX.

Frontend: Production code, Near-production prototypes, CSS, Tailwind CSS, HTML, Git, Component-driven development.

AI: Cursor, Claude Code, Claude skills, MCP servers, Figma Make, Agentic workflows, Designing for agents, Human-in-the-loop UI, Encoding design systems for AI, Research synthesis, AI-assisted prototyping and implementation.

Tools: Figma, Maze, Jira, Local development environments.

Hobbies

Martial arts since 2007, over 18 years: BJJ purple belt, Japanese Jiu-Jitsu black belt, and Judo green belt. Also Warhammer 30k, the gym, fishkeeping, karting, travel, and dogs, especially fluffy ones.

Education

BDes (Hons) Interaction Design, [Ulster University](#), First Class Honours (2017 to 2021)

Extended Diploma in Interactive Media, [Northern Regional College](#). Distinction*, Distinction*, Distinction (2015 to 2017)
