# Ben Turner

Product Designer / For Frontify

# Already designing DAM. Already helping ship it.

I lead design on Perforce P4 DAM, helping teams in games, film and VFX find, inspect and review digital assets.

### DIRECT DAM EXPERIENCE

Search, filtering, navigation and asset previews. I understand the product challenges behind managing complex asset libraries.

### DESIGN THROUGH TO PRODUCTION

I prototype, design and contribute production UI code, with developer review and integration.

### BUYER-FOCUSED THINKING

I redesigned trial onboarding so prospects could explore the product without lengthy setup. Sales reported easier conversations.

## ~25% more features shipped

Team result, Q3 vs Q2 2026. My implementation work and faster handovers contributed.

### Let’s talk about product design at Frontify.
